

Oil Companies, Finland and Norway

Fibrelite Supply Newly Designed Chambers to Finland and Norway

Newly designed 1.7m (S17) diameter tank sumps being installed in Norway

Fibrelite's latest tank sump design installed on CGH Nordic storage tanks

Project Overview

Fibrelite has manufactured their largest tank sump to date (1.7m dia.) to encapsulate the double manway lid configuration on storage tanks manufactured by CGH Nordic.

Fibrelite distributors Asennusliike Lahtinen OY and Engell & Kristiansen are the first customers for the new tank sump supplying UNO-X and ABC in their local markets.

Fibrelite's vacuum testable fibreglass tank sumps and 25 tonne rated GRP composite covers are being installed in both Norway and Finland.

Testable and Watertight

Fibrelite's high-technology RTM production methods are used to create a range of high quality fibreglass equipment which is both testable and watertight.

Testable Containment, Consistent Structural Integrity

Fibrelite's high-quality one-piece moulded tank sumps have a smooth finish for easy handling during installation. Designed and manufactured to withstand high groundwater pressure after installation for the lifetime of the site.

Industry Leading Composite Covers

Fibrelite's industry leading 25 and 40 tonne rated covers are used on fuel stations all over the world in the toughest of conditions. Watertight and easily removable – they are the preferred choice of oil companies worldwide.
